

ABSTRACT

The present invention provides a method of selecting an IL-2 production inhibitor and/or an
5 immunocyte proliferation inhibitor having low GATA-1
production inhibitory activity, which comprises
measuring the HDAC4 and/or HDAC8 inhibitory activity of
a test substance, and a method of selecting an
immunosuppressant having low thrombocytopenic activity,
10 which comprises measuring the HDAC4 and/or HDAC8
inhibitory activity of a test HDAC inhibitor.
